PAD i650

Bring the warmth and ambience of a fireplace into your home with the PAD i650. Designed for modern interiors, the i650 combines a striking flame display with flexible heating and extensive lighting options, allowing you to create the perfect atmosphere at the touch of a button.

With multiple flame colours and brightness levels, customisable ember, log and top lighting, adjustable flame speed and remote or app control, the i650 gives you complete control over both the look and feel of your fireplace. Heating can be selected independently, making it equally suited to creating ambience or adding warmth to your space.

**The Benefits:**

**1** **Customisable Flame & Lighting**

Choose from multiple flame colours and brightness levels, with additional settings for the ember bed, logs and top lighting to create the perfect ambience for your room.

**2** **Heat When You Want It**

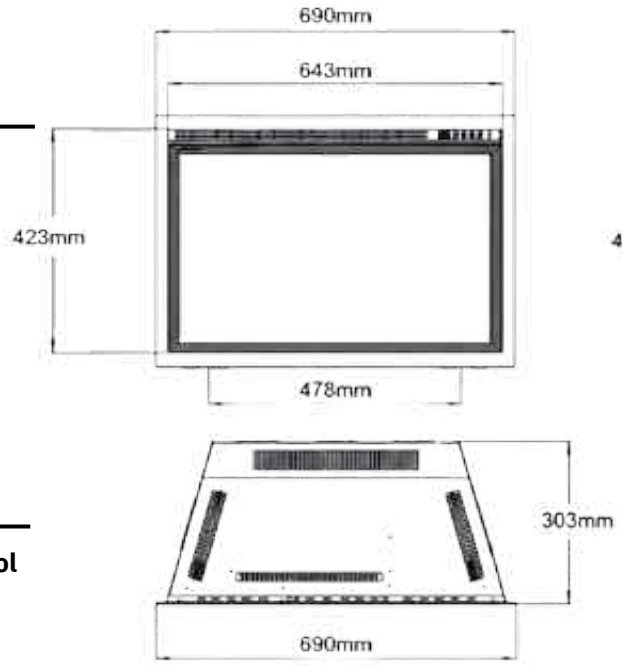

Enjoy the fireplace ambience with or without heat, with low and high heat settings plus adjustable temperature control for greater comfort.

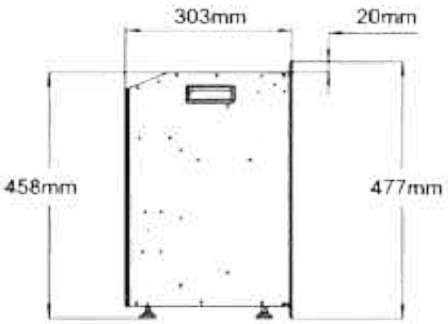

**3** **Smart & Convenient Control**

Operate the i650 from the supplied remote control or connect through the Tuya Smart app for convenient control of temperature, flame effects, lighting, sound and heating settings.
