Falun Group

# **Alvesta**
## Quick & Easy Wood Heating

The Alvesta is very similar to the Falun, but it's smaller size helps it to blend seamlessly into your home. Easy to run with a single air control lever, the Alvesta is highly efficient and uses only 1.9kg of hardwood per hour. The fresh air intake connection makes the Alvesta perfect for well insulated homes where a heater with a small footprint is required. The all steel body begins distributing heat within 20 minutes of lighting - making this a perfect heater for a holiday or second home.

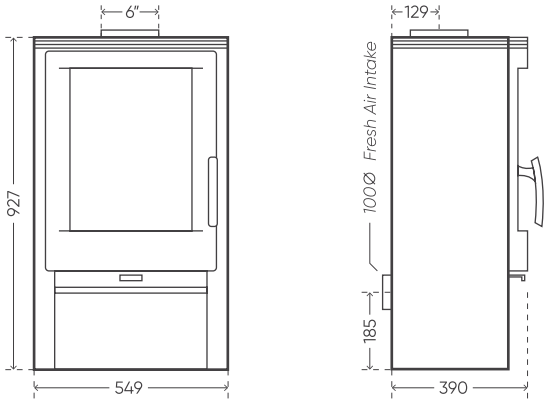

- 33cm Logs
- Easy to remove ash tray
- Optional Heat Bank
- Optional external air intake
